

# Annual Report and Action Plan

Company Name: **J. Blackwood and Son**

Trading As: **Blackwoods**

ABN: **43000010300**

## About APCO

Australian Packaging Covenant Organisation (APCO) is a co-regulatory not-for-profit organisation leading the development of a circular economy for packaging in Australia. APCO's vision is a packaging value chain that collaborates to keep packaging materials out of landfill and retains the maximum value of the materials, energy and labour within the local economy.

Each year, APCO Brand Owner Members are required to submit an APCO Annual Report and an APCO Action Plan. This document is the Annual Report and Action Plan output for the organisation listed above. This document provides the overall performance level of the organisation, as well as any commitments they have made to work towards on their packaging sustainability journey. This document may also include additional information provided by the Member in their report.

## Overall Performance **Good Progress**

The chart below indicates the overall performance level of this organisation listed above in the 2022 APCO Annual Report. The organisation's reporting period was **January, 2021 - December, 2021**

### Understanding APCO Annual Reporting performance levels:

- 1 Getting Started:** You are at the start of your packaging sustainability journey.
- 2 Good Progress:** You have made some first steps on your packaging sustainability journey.
- 3 Advanced:** You have taken tangible action on your packaging sustainability journey.
- 4 Leading:** You have made significant progress on your packaging sustainability journey.
- 5 Beyond Best Practice:** You have received the highest performance level and have made significant progress on your packaging sustainability journey.

**A:** Suite 1102, Level 11, 55 Clarence Street, Sydney, NSW, 2000  
**E:** apco@apco.org.au

## Additional Information

The information below indicates additional information that the organisation included in their APCO Annual Report.

**Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability**

Blackwoods has continued its focus to ensure a greater degree of comfort and understanding across all own brand packaging components.  
Packaging strategy and initiatives have been embedded into our NPD processes.

**Describe any opportunities or constraints that affected performance within your chosen reporting period**

Blackwoods has continued its focus to ensure a greater degree of comfort and understanding across all own brand packaging components.  
We continue to engage with the APCO team in anticipation for B2B programs that may be initiated. Looking for an industry approach to any packaging programs (such as ARL) for educating customers on packaging disposal. Blackwoods is solely a B2B business and not customer facing.  
We continue to have challenges with packaging industries, particularly in the South East Asia region, with providing recycled content of the packaging they provide.

**Please use the space below to provide examples or case studies of exemplary packaging sustainability conducted by your organisation.**

Blackwoods recently launched a new Prosafe disposable hygiene face mask. Taking into consideration the sustainable packaging guidelines and product safety principles we launched this new innovation which eliminated the need for soft plastic and allowing end-users to access a single mask hygienically from a bulk pack.

## APCO Action Plan Commitments

For each of the Packaging Sustainability Framework criteria listed below, a description is provided along with the commitments made by the organisation in their APCO Action Plan.

Criteria 1:

### **Governance & Strategy:**

This criteria considers actions to integrate packaging sustainability into business strategies.

- Develop a strategy that includes goals (objectives) and targets for packaging sustainability that addresses the Sustainable Packaging Guidelines (SPGs) or equivalent.
- Include a commitment to achieving the 2025 National Packaging Targets in our strategy.
- Have our executive or board of directors review our strategy and have the strategy integrated within our business processes.
- Regularly communicate and promote packaging sustainability objectives and targets within our

organisation.

- Regularly engage or communicate with our external stakeholders about the environmental impacts of our packaging.

Criteria 2:

### Design & Procurement:

This criteria considers actions taken to ensure that sustainability principles are considered in the design or procurement of both new and existing packaging through use of the Sustainable Packaging Guidelines (SPGs).

- Review **10%** of our packaging against the Sustainable Packaging Guidelines (or equivalent).
- Improve the accuracy of our data regarding reviews of packaging using the Sustainable Packaging Guidelines (or equivalent).
- Incorporate the Sustainable Packaging Guidelines (or equivalent) into procurement processes.
- Consider the following Sustainable Packaging Principles in our packaging reviews:
  - Design for recovery
  - Optimise material efficiency
  - Design to reduce product waste
  - Eliminate hazardous materials
  - Use of renewable materials
  - Use recycled materials
  - Design to minimise litter
  - Design for transport efficiency
  - Design for accessibility
  - Provide consumer information on environmental sustainability
- **10%** of our packaging to be optimised for material efficiency.
- Improve the accuracy of our data regarding packaging material efficiency.

Criteria 3:

### Recycled Content:

This criteria considers actions taken to increase or optimise the amount of recycled material used by your organisation.

- Use recycled content in:
  - Primary packaging that we use to sell our products
  - Secondary packaging that we use to sell our products
  - Tertiary packaging that we use to sell our products
  - Other items which we purchase (e.g. office stationary and suppliers etc.)
- **62%** of our packaging to be made using some level of recycled material
- Improve the accuracy of our data regarding use of recycled materials.

Criteria 4:

### Recoverability:

This criteria considers actions taken to improve the recovery of packaging at end-of-life and increase use of reusable packaging.

- 98% of our packaging to be designed to have all packaging components be recoverable at end-of-life.
- Improve the accuracy of our data regarding recoverability.
- Investigate opportunities to use reusable packaging.

Criteria 5:

#### Disposal Labelling:

This criteria considers the extent to which packaging has been labelled to help consumers determine what to do with packaging at end-of-life.

- 10% of our packaging to have on-pack labelling to inform correct disposal.
- Improve the accuracy of our data regarding labelling.

Criteria 6:

#### On-site Waste:

This criteria considers progress in increasing the amount of on-site solid waste being diverted from landfill.

- Have recycling programs for the following materials:
  - Paper/cardboard
  - Soft plastics
  - Timber
  - Metals
- Aim for 37% of our on-site waste to be diverted from landfill.
- Improve the accuracy of our data regarding on-site waste.

Criteria 7:

#### Problematic Materials:

This criteria considers the extent to which organisations are actively phasing out problematic and unnecessary single-use plastic packaging and preventing/reducing litter.

- Help reduce litter by:
  - Conducting regular clean ups
  - Participating in Business Clean Up Day
- Phase-out the following problematic and unnecessary single-use plastic items:
  - Lightweight plastic shopping bags
  - Expanded polystyrene (EPS) packaging for food and beverage service or retail fresh produce
  - EPS loose fill packaging
  - Moulded EPS packaging for white/brown goods or electronics
  - Rigid polystyrene (PS) packaging

- Rigid plastic packaging with carbon black
