3M™ DBI-SALA® Twin-Leg Nano-Lok™ LE and Twin-Leg Nano-Lok™ Wrap Back Self-Retracting Lifelines

Twin-Leg Nano-Lok™ LE and Twin-Leg Nano-Lok™ Wrap Back Models

3M Fall Protection announces an immediate **stop use and product recall** of the 3M™ DBI-SALA® Twin-Leg Nano-Lok™ *LE* and the Twin-Leg Nano-Lok™ Wrap Back Self-Retracting Lifeline. These Twin-Leg Nano-Loks are used as part of a personal fall protection system that connects two self-retracting lifelines/devices (SRLs/SRDs) directly under the dorsal D-ring of a worker’s harness. The Twin-Leg Nano-Lok *LE* is intended to be anchored at foot-level, is designed for sharp and/or leading edge applications and incorporates an energy absorber. The Twin-Leg Nano-Lok Wrap Back is intended for wrapping around an anchor and incorporates a similar energy absorber. 3M has determined that in a fall and under certain conditions, the energy absorber of these devices may not properly deploy which could expose the worker to serious injury or death. There have been no reports of accidents or injuries associated with this issue, **these products must be removed from service immediately.**
