		051939	051940	

How to correctly identify recalled KITO EDL units:

Product can be identified by Serial Number stamped on the hoist name plate

Product Model

Lot No.

Serial Number

See productsafety.gov.au for Australian product recall information

Product Safety Recall

Why the product is recalled: After operation of hoist in dual speed mode, the push button switch may stay engaged in low speed operation even after operator has released the switch.

Hazard: Operators, bystanders and other equipment can be compromised, and risk may occur.

Identify any affected units and stop using the hoists immediately.

Contact KITO PWB on 1300 792 262 to organise a corrective action. There are two options provided by KITO PWB to rectify the situation:

1. Distributor or end user may send the hoist to KITO PWB, who will remove, fit, and replace a new pendant for the hoist and return the product within a reasonable time frame.
2. Alternatively, distributor or end user may engage their own technician to fit a replacement pendant (which will be supplied free of charge), and a reasonable reimbursement cost will be provided up to \$75.

Ask our staff to find out more about the recall.
